

NOTICE TO MARINERS L17 of 2018

LONG REACH NAVIGATOR TERMINAL DOLPHIN REPLACEMENT WORKS

Mariners are advised that construction of a new upriver dolphin at Navigator No.1 Berth will start on or around the 11th September 2018. During the works the jack-up barge 'COMMANDER' and various logistics barges will be in use with a tug and safety boat in attendance at all times.

A set of tubular piles required for the construction works will be rafted together and moored at Broadness Reach or St Clements Reach (subject to weather and operational conditions), and marked with an all-round white navigation light. The piles are 60m in length and have a freeboard of 600mm and will be towed up river individually to the construction site from the mooring.

During the works the jack-up barge will be positioned immediately adjacent to Berth No.1 while piling operations are underway. Following the installation of the new dolphin the existing upriver dolphin will be removed and a new access bridge installed.

All vessels involved with the works will maintain a continuous listening watch on VHF Channel 68. At times International Code flags "Romeo Yankee" will be exhibited in conjunction with a "Proceed with Caution" being broadcast by London VTS.

These works are expected to last till the end of October 2018.

For the latest information contact London VTS on VHF Channel 68 or by telephone on 01474 560311.
