

NOTICE TO MARINERS L10 of 2022

SEA REACH LONDON GATEWAY BOREHOLE SAMPLING

During the week commencing 15th August 2022, and lasting for approximately 4 weeks, the jack-up barge 'OCEAN CREST MARINE' (OCM 80) will be undertaking geotechnical investigations to inform the further design of the new berth No. 4.

During the works the support vessels 'SBS SURVEYOR' & 'MPV BULLDOG' will be utilised for the transfer of crew each day between the jack-up barge and Gravesend.

For the safety of those working on board the OCM 80 a temporary **100m exclusion zone** around the jack-up barge will be in place for all vessels in the vicinity except in the circumstances when a vessel is moored, departing or Berth No. 3 at which time that vessel and any assisting tugs will be permitted to be within 75m of the jack-up barge.

The repositioning of the JUB will be carried out in conjunction with London VTS to ensure there is no impact with vessels manoeuvring in the area. During reposition the OCM 80 will be restricted in its ability to manoeuvre and will display the lights, shapes and signal flags in accordance with the *International Regulations for Preventing Collisions at Sea 1972 (as amended) Rule 27B*.

All vessels will maintain a listening watch on VHF Channel 68.
