

Thames Tideway Tunnel: CSO Diversions

NOTICE TO MARINERS

Thames Tideway Tunnel: CSO Diversions

Mariners are advised that constructors for the Thames Tideway Tunnel are in the process of connecting the tunnel to new combined sewers at seven sites on the Thames.

At this stage in the process the new combined sewers are connected to the Tunnel but the tunnel is operating to half its capacity. This means that any rainwater and raw sewage which would normally be collected by the Tunnel and transferred to a treatment plant at Beckton may instead discharge directly into the river at these sites if the half tunnel becomes overwhelmed or is not available.

This half tunnel testing period is expected this period to be in effect until later in 2025.

The seven sites and their associated Notice to Mariners are:

King Edward Memorial Park	M57-24
Blackfriars Embankment Foreshore	M75-24
Victoria Embankment Foreshore	M90-25
Albert Embankment Foreshore	M89-25
Heathwall Pumping Station	M65-25
Chelsea Embankment Foreshore	M23-25
Putney Embankment Foreshore	M85-24 , U34-24

If no Notice to Mariners number is associated with a site this means that it has not yet been connected to the warning system. This Port Wide Notice will be updated regularly as new CSO sites are diverted.

Telephone calls, VHF radio traffic, CCTV and radar traffic images may be recorded in the VTS Centre
