

CONSULTATION STATEMENT: C01-25:

Trial of CSO Warning Lights

This consultation ran from 20/03/2025 to 19/04/2025. The below statement has been provided to summarise the Port of London Authority's response.

Following the consultation on the location and characteristics of warning lights at Tideway Tunnel Combined Sewer Outfall (CSO) sites along the Thames, no responses were received.

Accordingly, the PLA, Tideway and their contractors - NASH Maritime and Beckett Rankine - have taken this as an indication of general acceptance of the appropriateness of the proposed lights. These lights will therefore be brought into operation at the relevant sites in due course, with details to be communicated via Notice to Mariners.
